

Introducing an innovative, hygienic and therapeutic paraffin wax. The Orb - new technology- provides unique, warm brush application of wax to the feet. A combination of coconut, Jojoba, essential oils and paraffin wax, leaves skin feeling nourished and smooth.

The Orb wax therapy increases blood flow, tolerance for pain, relaxes muscles and increases hydration in the skin - making it particularly beneficial for those suffering from arthritis and rheumatic pain.

The heated paraffin can also help to ease pain caused by arthritis, bursitis chilblains, chronic joint inflammation, eczema, psoriasis, sore muscles, scar tissue, stiff joints, tendonitis and sports injury.

£20 for one treatment or £15 when added to a routine foot care appointment.
